CAREER OBJECTIVE:

Motivated and detail-oriented **CSE graduate and fresher** with a strong foundation in **Data Science, Machine Learning, and Data Analytics**. Skilled in analyzing real-world datasets, extracting meaningful insights, and developing predictive models using **Python, Scikit-learn, Pandas, and NumPy**. Seeking an entry-level opportunity in Data Science, Machine Learning, or Data Analytics to apply analytical and problem-solving skills, contribute to data-driven projects, and gain hands-on industry experience. **(Currently expanding Data Analytics skills and developing related projects.)**

SKILLS

Programming Languages: Python, C, C++, Java

Data Analysis & Visualization: Microsoft Excel, Matplotlib, Seaborn, Power BI, Tableau,

Data Analytics & BI Tools: Excel (Pivot Tables, Charts, Data Cleaning), Power BI (Data Modeling, DAX, Dashboards), Tableau

Data Science & Machine Learning: NumPy, Pandas, Scikit-learn, PyTorch

Web Development (Supporting Skill): HTML, CSS, Bootstrap, Django, REST API

Database: MySQL, SQLite, SQL

Tools & Technologies: Git, GitHub, VS Code, Postman, MS Excel, PowerPoint, Word

Core Concepts: Data Cleaning, Exploratory Data Analysis (EDA), Data Visualization, Statistical Analysis, Data Structures & Algorithms (Basic), Object-Oriented Programming (OOP)

WORK EXPERIENCE

Teacher

Taharat Model School — 2022 to 2025

- Taught students core subjects, planning lessons and assessing academic progress.
- Developed strong communication, organization, and problem-solving skills applicable to analytical work.

PROJECTS

Salary Prediction System

Tech: Python, Pandas, Scikit-learn, Streamlit | [GitHub](#) |

- Built a machine learning model to predict salary based on experience and education.
- Deployed the model using Streamlit for real-time prediction.

Diabetes Prediction System

Tech: Python, Pandas, Scikit-learn, Streamlit | [GitHub](#) | [Live Demo](#)

- Built a predictive system for diabetes detection using medical data.
- Performed data preprocessing, feature selection, and model training.
- Deployed the model using Streamlit for real-time prediction.

Titanic Data Analysis

Tech: Python, Pandas, Matplotlib, Seaborn | [Source Code](#)

- Performed exploratory data analysis (EDA) on the Titanic dataset.
- Visualized survival patterns, age distribution, and fare analysis.

Todo App

Tech: Python (Django) — Task management application implementing full CRUD operations. | [Source Code](#)

E-commerce Website

Tech: HTML, CSS, Bootstrap, Python (Django) — Full-featured e-commerce site with product listing and order management. | [Source Code](#)

Book Store Management System

Tech: HTML, CSS, Bootstrap, Python (Django) — System to manage book inventory, sales, and records. | [Source Code](#)

Bank Management System

Tech: HTML, CSS, Bootstrap, Python (Django) — System to manage customer accounts and transactions. | [Source Code](#)

EDUCATION:

Bachelor of Science in Computer Science & Engineering

Prime University — 2022 to 2026 | CGPA: 3.20 / 4.00 (without thesis)

Higher Secondary Certificate (HSC), Science

Rupnagar Govt. School & College — 2019 to 2021
